

Dockerizing Go

 calmandniceperson

 rettetdemdativ

What is docker?

- Containers
- Abstraction and automation
- Portability and agility
- Mostly, it's awesome

The Gopher and the Whale - A Match Made in Heaven

- Docker written in Go
- Many images available
- Deploying Go applications quickly
- Go cross-compilation

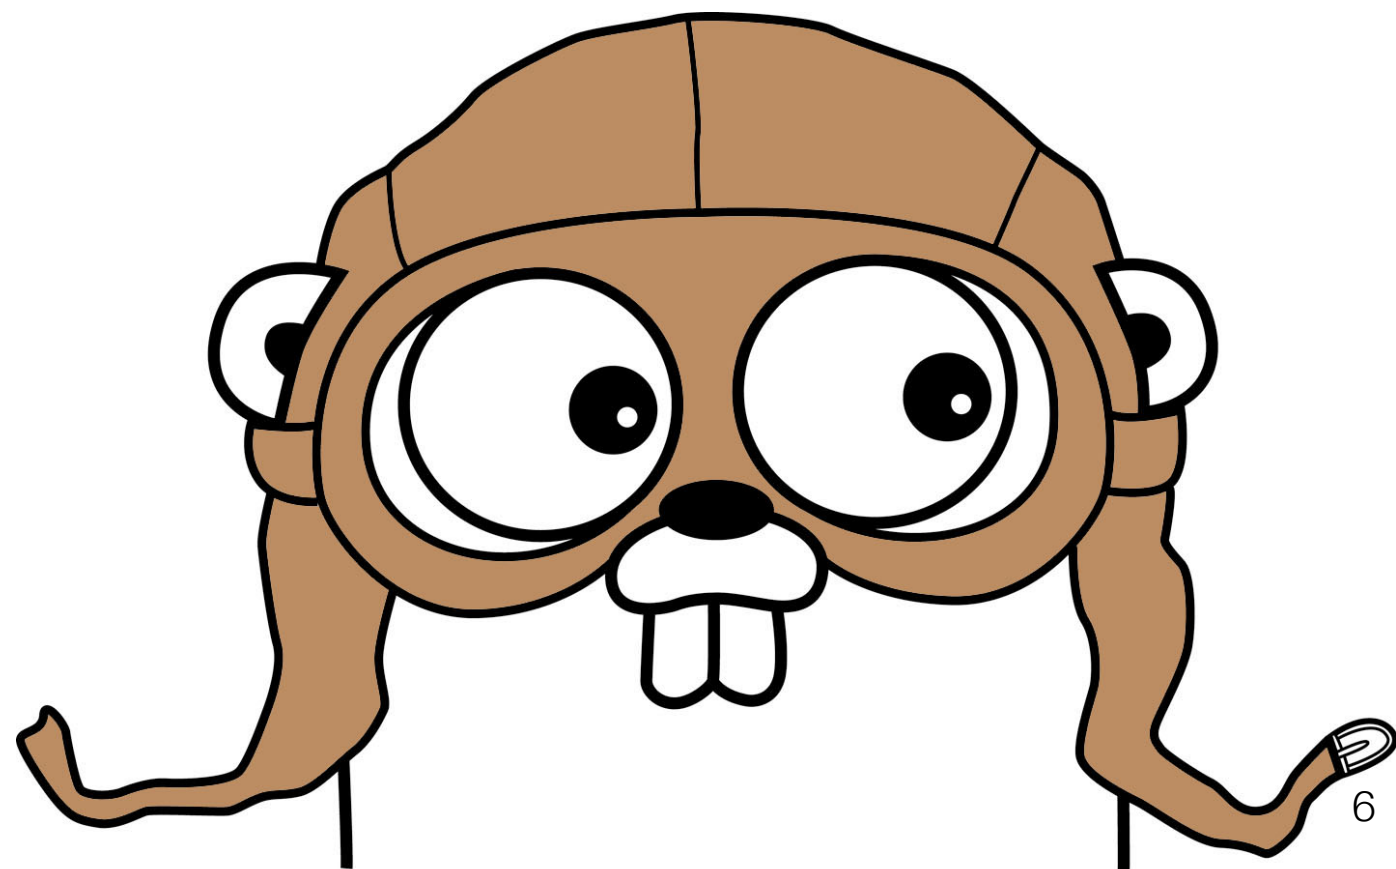

time to get our hands dirty

at least a little

More magic

- Go application
- Networks
- Volumes
- Database
- Logging services
- ...

That's it! Questions?
